

We want you to be comfortable during your visit, so please, put a checkmark next to the statement that describes how you feel about your smile's health and your overall smile care. Check as many as you like.

I gag easily.

I feel out of control while lying in the dental chair.

I have not been seen by a dentist for a long time, and I am worried about what you will tell me about my dental hygiene.

I am embarrassed about the way my teeth look.

I have had a bad experience, and I have a lot of fear which has kept me from getting the dental care I need.

I am very apprehensive about the possibility of experiencing pain, and its prevention is a top priority for me.

Please tell me what I need to know about my mouth so I can make informed decisions.

I want to be able to ask as many questions as necessary so that I understand why and what treatment is being recommended for me.

I have difficulty listening and remembering when I am in the dental chair.

I would like to see pictures and videos that will help me understand my dental problems and possible solutions.
